Dear James:

**Re: Wireless Services at the Lester B. Pearson International Airport**

The Wireless Carriers still seek to bring negotiations concerning wireless service at the Lester B. Pearson International Airport to a successful conclusion with a review of the proposals made to date and a request for continued negotiation.

Should the GTAA prefer that the Wireless Carriers fund the capital required to serve public areas of the Airport:

The Wireless Carriers will fund 100% of the carrier specific base station equipment required to serve the Airport's public and private areas, including all outdoor areas.

2. The Wireless Carriers will fund 80% of in-building systems required to extend high quality service to in-building public areas, recognizing that the GTAA will also use one fifth of this system for its own private communications requirements.

The Wireless Carriers will, effective the date of the new agreement, increase rents to 250% of previous rates to \$50,000 each, scaled annually with passenger traffic.

Should the GTAA insist on being the sole owner of the in-building systems designed to serve the public areas of the airport, and should the GTAA fund the required capital with no direct capital contribution from the Carriers, the Carriers are prepared to pay substantially higher rents, \$100,000 each per year, and carry the financing costs of the public portion of the relevant capital at the GTAA's cost of capital, as per our letter of June 14, 2002.

Should the GTAA insist on being the sole owner of the in-building systems designed to serve the public areas, and should the GTAA require that the Wireless Carriers fund the capital for their portion of that system, but get no ownership rights in return, the Wireless Carriers would seek credits of equivalent value to their investment in that system, applied, over time, against annual rents.

We feel that a review of the key terms here may help bridge the current impasse, and we invite further negotiation to address outstanding items. Furthermore, we remain open to proposals from the GTAA. In any event, we request the courtesy of a response in an expedited fashion given your deadline on terminating the existing leases.

We wish to resume our negotiations as soon as possible and request an extension to current leases under existing terms to ensure service continues for our mutual customers while this matter is being settled.

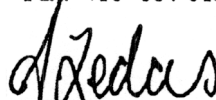

Yours sincerely,
